

The Federal Communications Commission

Dear The Federal Communications Commission,

I strongly recommend you reject any flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

This flat fee proposal is unfair to the low volume customers. Why should any low volume customer have to pay as much as a high volume customer. Its like saying everyone should be paying a flat fee for Federal Taxes. This fee should be based on customer usage. The more you use the system, the more you pay for support of all types of services including the USF.

I only use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. Please reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Joe Cropanese
